

SINE33GPU+DC GROUND POWER UNIT

SINE33GPU+DC 30, 45, 60 & 90 KVA SOLID STATE 400HZ GROUND POWER UNIT

Sinepower has been developing and manufacturing 400Hz solid state Frequency Converters for more than a decade now.

Our policy, has always been, to offer the best designed products that are environmentally friendly, simple to use, easy to maintain and exceptionally well manufactured thus meeting our clients requirements as well as complying with all standards and legislation.

Sinepower's GPU&DC units were designed with Power factor correction to guarantee a perfect sinusoidal input current from 25% to 150% load and a low THDi (<1.5%).

The 28VDC offers a solid-state Ground Power Supplies that range from 300 A continuous – 1200 A Peak load and 600 A continuous – 2400 A Peak load.

Sinepower ensure high quality, efficient and secure electrical power supplies.

As result of our constant development efforts we have launched our latest GPU&DC units, that are an extension of our 400hz solid state frequency converter range and are the safest and most reliable solution for your aircraft power supply.

The 28 VDC GPUs are continuous DC power supply units that supply DC power to aircrafts that are on the ground to start the engine and the APU (Auxiliary Power Unit) of the aircraft as well as for the on-board power supply.

Our design team have focused there efforts on developing a highly efficient and fully compliant GPU unit with many features:
